SHEA BULLETIN

KEY POINTS:

- **Successful Surveillance Audit**
- **External Certification ISO 9001, 14001 and 45001**

Dear colleagues,

We have successfully completed our External Certification Surveillance Audit for ISO 9001(Quality), 14001(Environment) and 45001(Health & Safety).

The focus was on our delivery of Highways Project and the site at Harlow in Essex was selected to provide a site-specific example of this. Not only have we been recommended to continue with our certification, but there were zero formal findings reported.

The auditor stated *"I found a great site which was tidy, and well-managed. The team were excellent, enthusiastic, and keen to show-off the site. Understanding that it is a work in progress, there was good evidence of progress with the Management System. All commercial aspects of the project were clearly presented, and there was strong SHEQ support given with a named SHE advisor and the SHEA Director"*.

I would like to thank Christine Brown for facilitating the audit, the team at Harlow namely Sam Martell, John Muir and Jawad Chowdhury; as well as Jamie Rafferty and John Bowers, for their support and time given to the audit. I was extremely proud to be able to showcase the project to the external auditor, and receive the fantastic, positive feedback.

Well done all!

Kind regards,
Neil Wilson
SHEA Director
